

Online Education

Education holds a paramount significance in our lives. In the contemporary era, the accessibility of education has been greatly facilitated by the widespread availability of the internet, rendering it unnecessary to physically attend educational institutions. The advent of online education has emerged as a particularly effective solution, especially during the challenging times of the COVID-19 pandemic.

In the present day, the internet has become a household staple, making online education accessible to individuals regardless of their geographical location. Whether residing in a village or a city, the prevalence of online education is undeniable. The convenience of joining online courses from anywhere in the country or even abroad underscores the transformative impact of this educational approach.

The global pandemic has had a profound impact on education systems worldwide, prompting the temporary closure of educational institutions in an effort to mitigate its repercussions. This unprecedented situation has further underscored the importance and effectiveness of online education as a resilient and adaptable alternative for students facing disruptions to traditional learning methods.

Online education is useful for many reasons:-

1. It's flexible,
2. It offers a wide selection of programs,
3. It's accessible,
4. It allows for a customized learning experience,
5. It's more cost-effective than traditional education.

Logic Puzzles And Games

Engaging in logic puzzles and games presents individuals with challenges that necessitate the application of logic, deduction, and problem-solving skills to discover solutions or answers. These challenges span from simple riddles and brain teasers to intricate mathematical and spatial problems. Sudoku, Crossword puzzles, Chess, Rubik's cube, and Escape rooms are notable examples within this category. The practice of logic puzzles and games serve as a means to enhance logical thinking skills by stimulating the brain, assessing knowledge, and fostering reasoning and creativity. By participating in logic puzzles and games, one can refine their decision-making abilities through the improvement of cognitive functions such as memory, attention, concentration, and mental flexibility. These cognitive skills play a crucial role in information processing, evaluating options, and determining the optimal course of action. Additionally, the engagement with logic puzzles and games contributes to the development of critical thinking skills, involving the identification of assumptions, biases, and fallacies, the analysis of arguments, and the drawing of well-founded conclusions. Such skills are indispensable for avoiding errors, inconsistencies, and contradictions in one's reasoning and decision-making processes.

What Make People Successful?

Success means different things to different people. Some see it in achievements or reaching goals, while others find it in contributing to their families or communities. Many connect success with wealth, fame, and respect at work, but it doesn't have to be just that.

Success can also mean being content with yourself and your career. For many, a successful person is someone who feels highly satisfied with their work and life in general.

So, how do we achieve this satisfaction? Successful people usually do two things consistently: they use their natural abilities in their work, and they set goals for their career and life. In simple terms, they choose careers where they can do what comes naturally to them.

For instance, successful teachers are good learners, and the best doctors know how to listen patiently. Successful people understand where they are starting from and the direction they want their lives and careers to take.

See The Bug

See the bug on the rug,
I will give his legs a tug.
See him run, see him go,
He did not like it! No! No!
See him hop on the mop.
Seeing him hide makes me stop.
I will stop, I will not tug,
Our safe, little bug.

By:- Chandra Hasini, VC

My Mother

My Mother
No one can't take your place,
You are everything to me,
Your hugs are warm,
And make me happy.
You nurse me whenever I fall ill
You help me in my studies,
You are my guide,
Whenever I go wrong you show me the right path.

K. Anirvansh, VC

The Greedy Sons

Once upon a time there lived an honest man who had three sons. One day he called his sons and told them, “You have helped me, so I will tell you a secret. I have three boxes for you, my children. But, if you don’t share the wealth with each other, whenever you start using the wealth, the things in your house will turn into coal.” The sons thanked their father for the wealth.. After that, the sons started their quest. The first son found a box with gold coins in it and thought to take the coins for himself. The second son found a box of silver coins, his thoughts were the same as his older brother. The third son found a box of diamonds, but he thought about what he would do with the large amount of diamonds and decided to share the diamonds with his brothers. As the first two brothers used their wealth without sharing, the things in their house turned into coal. The old man appeared in front of the two elder brothers and said that they were punished because of their greed. The brothers realized their mistake and lived happily together.

Moral: It is foolish to be greedy in life.

Our Universe

Our Universe began approximately 13.7 billion years ago, when a cosmic bubble exploded— that cosmic bubble is known as “The Big Bang”. The universe is made up of 5% of normal matter, 27% of dark matter and 68% of dark energy. The universe contains numerous galaxies. We live in the Milky-Way galaxy. Our galaxy contains at least 100 billion stars and 5000 planets. The universe contains about 100 billion galaxies. Scientists believe that the observable universe stretches across 93 billion miles. In 1920, the astronomer Edwin Hubble discovered that the galaxies were racing away from each other, which meant the universe was expanding constantly. Scientists believe that the universe will stop expanding and collapse one day—and that will be called “The Big Crunch”.

Miniature Niagara Falls In India

The Dhuandhar Falls is a waterfall in the Indian State of Madhya Pradesh. It is the largest waterfall in India. The word 'Dhuandhar' is derived from two Hindi words Dhuan (smoke) and Dhar (flow), meaning a waterfall where one can feel a smoky atmosphere (this smoke is formed by water vapour or the smoke fall). The Narmada River making its way through the world-famous Marble Rocks, narrows down and then plunges into a waterfall known as Dhuandhar. The plunge, which creates a bouncing mass of mist, is so powerful that its roar can be heard from a far distance. This place is famous for the high marble rocks making a valley through which river Narmada flows. One can access Dhuandhar waterfalls from the east bank as well as the west bank of the Narmada River.

History Of Ram Setu

Ram Setu is a bridge on the southern tip of Tamil Nadu to Sri Lanka. It is built of limestone shoals, during the war between Lord Rama with his Vanara Sena and the Demon king Ravana. When Ravana kidnapped Lord Rama’s wife, Sita, Lord Rama sent Hanuman to Lanka. The soldiers of the kingdom burnt Lord Hanuman’s tail, he burnt the kingdom. When Lord Hanuman returned from Lanka, he along with the Vanara Sena built the bridge. The feature is 48 km long and separates the Gulf of Mannar, from the Palk Strait. Some regions of the bridge are dry, and the sea in the area rarely exceeds 1 meter in depth, making it quite difficult for boats to pass over it.

If I Become the Wealthiest Person on the Planet

If I become the richest person in the world, I want to share some of my money with people who need help, especially with orphanages. I also dream of taking care of a whole village, making sure it gets better and stronger. I'll do things to stop pollution and tell everyone how important it is. And yes, I'll use a bit of my money to build a nice home for myself. But most of all, I'll use my wealth to make the world a better place for everyone.

Garden

Gardens are wonderful and peaceful.
The flowers grow so gracefully.
Butterflies and honey bees roam around and have fun
Fruits and vegetables are so delicious.
Now let's stop deforestation.
And cultivate more and more trees and plants to enjoy nature's offerings..

The Magical Flamingo

One day, as the old man was taking a walk through the park, he came across a wounded Flamingo, struck by an arrow. Feeling sorry for the hurt bird, the old man decided to help it get better.. To his surprise, the Flamingo turned out to be magical and, in gratitude, transformed into a young girl. The magical girl came to the old couple's house one night, asking for help. The kind old couple let her in, and she gladly helped the old woman with chores and the old man with his work. The couple liked her and wanted her to stay with them. She agreed happily. After a while, a big famine hit the village, and the old man's crops got ruined. To survive, the couple had to sell their valuable things like brass, silver, and antiques. Life got tough as they struggled with hunger. Seeing that the old couple was having a tough time, the magical girl, who used to be a Flamingo, wanted to help. So, she made a special fabric using her feathers. The old man sold it and was happy to have money to live and take care of himself and his wife. Finally, they all lived happily because of the magical kindness of the Flamingo.

Save Water

We should save water from being polluted and avoid the mixing of industrial wastes into the water. There should be proper waste management system which must be followed by everyone. Clean water is very essential component of life, so we need to conserve water for the future. We require water every day for our personal uses like cooking, washing, bathing, drinking etc. Our body also requires approximately 4-5 liters of water everyday. Water is essential not only for human being but also for animals, plants and birds. That is why we need to save water. Just like there is no life without oxygen, there is no existence without water. It exists in the form of seas, oceans, lakes, etc. and also in the form of ice. Thus water is very precious, so we should not waste it So we must save water and keep it clean.

The White Ice Cream

Once upon a time, there lived an ice cream seller. He had a variety of ice creams in his store. Everyone wanted to eat the ice creams he sold. He had all colors of ice creams like pink, yellow, orange, white, purple etc. But most of the people ate all the ice creams except the white one. The white ice cream was very sad. Seeing that, the ice cream seller asked the reason for his sadness. The white ice cream replied saying that no one prefers eating him so he was sad. He asked the ice cream seller for a solution. The ice cream seller thought for a while and added some chocolate syrup, and some sugar balls as toppings. Everyone wanted the white ice cream with toppings, as it looked delicious. He thanked the ice cream seller for finding a solution his problem.

Moral: There is a solution for every problem. Do not get disheartened.
